Hello,

My name is Jay Morris and I'm a student at the Illinois Institute of Technology. I am working with a group of engineering and architecture students on an interprofessional project. We would like to design and ultimately propose a linkage between the CTA and Metra that would connect the Ogilvie and Clinton green line stations. We believe that we can design a system that would be cost efficient while also making the transition much smoother for your customers.

In order to do this we are requesting access to the Ogilvie platform drawings. I will be more than happy to answer any questions that may arise. Thank you
