RE: 19-FOIA-209 Info - Current Equipment Cycles

Dear Mr. Clement:

Metra's FOIA Department ("FOIA Department") is receipt of your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 *et seq.*

On July 29, 2019, we received your request for Metra's current equipment cycles across the whole network ("**Request**").

The FOIA Department replied to your email to ask for clarification as to what you meant by "equipment cycles". You sent a copy of Metra's response letter to your 2015 FOIA request seeking similar records and noted you would like the current version of these files or their equivalent.

The FOIA Department contacted you on August 12 to inform you we would be unable to meet the deadline to respond to your Request as scheduled, as Metra's Transportation department was still working with its districts to collect your requested records. We asked if you would grant us a short extension to August 16 in order to finalize your request, which you did.

In response to your Request, the Transportation department has provided the current equipment cycle sheets for each district Metra operates. Please be advised that although the Metra Electric District train line does not have equipment cycle sheets per se, the weekday / weekend train and car mile information for that particular line is also included.

Sincerely,

Kathleen E. Haton
Freedom of Information Officer
